THURSDAY, JUNE 17, 1937

#### - or Else!

In 1930, the Federal debt was \$16,000,000,000. Today it approaches \$36,000,000,000 because in recent years Federal expenditures have exceeded revenue by

about 100 per cent. Thus we are now in a position similar to that of the post-war days, when the nation faced a tremendous debt, largely occasioned by loans to foreign powers. After the war, however, the government operated with reasonable economy and efficiency, and the debt was steadily cut down. Today the debt reduction problem is not so simple, for the Federal government, to an extent hitherto unknown, has become a vast and constantly expanding bureaueracy that costs us more than \$7,000,-

Senator Byrd of Virginia, one of the few congres-000,000 a year. tional advocates of real economy, has cited some astounding figures. The Federal civil executive payrollexcluding relief, military and pension rolls-grew at the rate of 1,000 persons a month between December, 1934, and September, 1936. It now costs the taxpayers \$1,500,000,000 a year. And so rapidly has this bureaueracy expanded its operations, that more than 85 percent of the personnel is employed outside Washington.

Senator Byrd says also, eiting another example of bureaucratic growth: "In March, 1933, the government was leasing 6,084 buildings or parts of buildings outside of Washington. Between then and July 1, 1936, the Ieased number rose to 11,842, although in the meantime the government has built 664 new buildings at a cost of \$329,000,000."

Worst of all, perhaps, is the fact that in the face of recovery made from depression, we are still spending at an "emergency" rate. Here is an intolerable situation that must soon be corrected-or else! \* \* \* \* \*

#### The Supreme Court Score

The United States News recently compiled what it terms "The New Deal's 'Won and Lost' record in the

Supreme Court." Two Court terms have been concluded in which Administration measures have been decided. In 13 cases, the Administration has been sustained. In 11 it

has lost. Cases in which it has been upheld include such measures as: Gold devaluation, the TVA, the arms embargo, the silver purchase policy, the 2nd Frazier-Lemke farm mortgage moratorium act, the social security

Cases which it has lost involved the NRA, the AAA the Guffey Coal Act, the Rail Pension Act, and the

Municipal Bankruptcy Act. Most favorable to Administration laws, says the News, was Mr. Justice Cardozo, who cast 19 votes for New Deal laws and 5 against. Most unfavorable was Mr. Justice McReynolds-5

for New Deal laws, 19 against. It is interesting to note that Mr. Cardoza was appointed by a Republican-President Hoover; Mr. Mc-

#### Reynolds by a Democrat-President Wilson. \* \* \* \* \* \*

which the world has ever known is not based upon the trians. He also sent eight others to the hospital. A few theory that everybody should have absolute liberty, but days later a terse little announcement in the local press rather that everybody should have as much liberty as told what had happened to the comrade. He had been possible without hurting the whole society. Unrestricted executed. liberty for all is anarchy. Complete liberty for special

prize their democracy should let one group in its society have almost complete freedom from control. Labor, unions have fewer legal restraints upon them than any other group, yet every day they demand and take more

freedom. It used to be a crime to interfere with United States mails. Yet now in the Mid-West, strike pickets are censoring mail before they let it go into factories.

It used to be that a man could work if he wanted to. Yet now strike pickets are making men go on relief by

refusing to let them work. It used to be that a man could either join or refrain from joining a union. Yet it is reported that a recent Chrysler plant sit-down strike was called to make some union members pay their dues and to force others to join.

It used to be that a man did not have to belong to union to hold a job. Yet a General Motors sit-down strike was threatened because two unionists did not like to work alongside two non-unionists.

It used to be that when a man worked hard and long and built himself up a business he could run that business. Yet another sit-down strike recently forced such a man to retire from control of his business.

It used to be that a contract was a contract, Yet there have been nearly three-score sit-down strikes in automobile plants since contracts were signed forbidding

Where and how must it end? In another "ism" or the restoration of real democracy?"

#### Social Security or Insecurity The Supreme Court has just upheld a statute de-

signed to protect American workers against unemployment and a helpless old age-the Social Security Act. A little impartial thinking must raise doubts as to whether that "security" is as "secure" as we would like to believe. In the first place, employers will, through taxes,

provide two-thirds of the money set aside for old-age pensions and unemployment insurance. The employees will contribue the other-one third. It behooves us, therefore, to consider the steadiness of the source of the two-thirds of the money.

Isn't it logical to assume that social security isn't secure unless the employers are secure? If the employers are forced out of business, where will the money come from?

When times are good, there will be little to worry about. But Congress has enacted another law which strongly discourages the creation of reserves to pull manufacturers through hard times. It has, in fact, levied heavy punitive taxes on such reserves. It is an admitted fact that few employers, when another depression comes along, will have enough reserves to let them spend more than \$25,000,000,000 out of their savings as they have done in recent years. They won't have the savings.

Furthermore, it is now proposed to lay new and heavier burdens upon them by adopting a shorter week so as to spread employment. Unless an employer who hires five men to do the work that four did before increases the cost of what he sells, he will be put out of business. If he does increase the cost, he will have trouble selling, and maybe again be put out of business.

When tax sources dry up, there are no taxes. Unless the sources of taxes are secure, there can be no social

The lion is not naturally aggressive. On the controry he fears human beings instinctively. A lion's first thought is to escope when he comes in contact with man, accordwhen driven to it as a last resource

After June 16, the newlyweds will is accompanied by cubs. Sametimes, too, a llon may become a man-enter through old age, toothlessness, and lack of game to kill. But contact with mankind is avoided by normal lions, unless, as sametimes happens, they are moved by curiosity.

> Call of Snakes The ratilesnake is typical of the snakes that coll before striking, As soon as it is alarmed, it throws its body into a coil, with head raised a little above the rest of the body. When ready to spring, the muscles of the upper part of the snake are suddenly contracted, so as to straighten the body abruptly and thrust the head forward in a direct line. As the upper part of the body only is omployed, the snake never strikes at a greater distance than ope-third to one-half its length.

## ANTIOCH

Eileen Osmond Is Bride of V. A. Lewin

A pretty wedding of the week-end was that of Miss Eileen Osmond, daughter of Mr. and Mrs. Lester Os-mond, 950 Hillside Ave., and Virgil A. Lewin, son of Mrs. Anna Lewin of Wadsworth, at St. Peter's church Saturday morning at 10 o'clock. The Rev. Father Flaherty performed the

Miss Osmond wore the traditional white lace fashioned on princess lines with a long tulle veil. In her arms she carried white roses and lillies of the valley. She was given in marriage by her father.

Miss Lillian Vykruta as maid of honor, wore a gown of peach chiffon and carried a bouquet of roses: Misses Mary Osmond, Hazel

Hawkins, Geraldine Biester and Ruth Cremin, bridesmaids, were dressed in pastel shades of organza, wore matching turbans and carried roses.

Merrill Lewin was his brother's best man and Ernest Leable, Ray Flood, Morris Bonn and Don Adams were

Miss Grace Jyrch played "Lohengrin" wedding march and Miss Jyrch and Miss Olivette Pogas sang a duet during the Mass.

A reception for 50 guests was held at the home of the bride's parents after the ceremony. White roses and bouquets of garden flowers, decorated

the house. Among the out of town guests in attendance were Mrs. George Yopp of Burlington, Mrs. Anna Strang of Wadsworth, Harry Kurth and daughter of Chicago, Earl Strang of Waukegan, Mr. and Mrs. Ralph James and Mrs. Louise Gilbert of Chicago.

Mr. Lewin and his bride spent their. honeymoon in the southern part of Canada. They are now at home on Spafford street, Mrs. Lewin was graduated from the A. T. H. S. and is also a graduate from State Teacher's College at Dekalb. For the past two years she was a teacher at Hickory school. Mr. Lewin is a graduate of Warren High school.

MRS. HARVEY CELEBRATES BIRTHDAY WITH PARTY

Mrs. Henry Harvey was pleasantly surprised Tuesday evening, when a number of friends gave her a party at her home at Little Silver Lake, the occasion being her hirthday anniversary. CHRISTIAN SCIENCE CHURCHES

"God The Preserver of Man" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, June 13.

The Golden Text was, "In God Is my salvation and my glory; the rock of my strength, and my refuge, la ln God" (Psalms 62: 7).

Among the citations which com-prised the Lesson-Sermon was the following from the Bible: "Preserve me, O God: for in thee do I put my trust. The Lord is the portion of mine inheritance and of my cup: thou maintainest my lot. The lines are fallen unto me in pleasant places; yea, I have a goodly herlinge" (Psnims 10: 1, 5, 6).

The Lesson-Sermon also lueluded the following passages from the Christian Science textbook, "Selence and Health with Key to the Scriptures," by Mary Baker Eddy: "There is today danger of repeating the offence of the Jews by limiting the lloly One of Israel and asking: 'Can God furnish a table in the wilderness? What cannot God do?" (p. 135).

and Robert.

WATCH WEIGHT OF PULLETS FIRST YEAR

Frequent Checks Should Be Made of Progress.

ny C. O. Dossin, positry department, Pennsylvania State College, WNU Service.
Pullets should gain in weight during the first laying year. Some poultryinen make a practice of marking a few pullets and then weighing these same hirds every week or two through the full months to keep a cheek on the birds' weight. Others just catch a few of the birds occusionally and handle them for weight and amount of fesh

on the breastbone. If one has occasion to go into the hen house at night after the birds are on the perches, that is also a good time to check on the birds' weight and condition. Another good time to note the amount of flesh on the breast is while removing the eggs from underneath the pullets in the nests.

If the pullets lose weight, there is a good possibility of their going into a molt. To maintain body weight or to Increase It, feed more to the birds. Give all the scratch feed the birds will ent at night and about one half that amount in the morning. Keep dry mush before the birds at all times. Filling the feeders with fresh mash each day will encourage greater mash intake than when the feeders are filled once or twice a week. Stirring up the mush in the feeders occusionally also

The use of lights in the hen house to lengthen the working day of the birds will increase feed intake. A 13 or 14-hour day will meet the requirements of the average flock,

Two Principal Methods

of Finishing Poultry There are two principal methods of fluishing poultry - pen-feeding and erate feeding. The former method is generally used for turkeys and waterfowl, the latter for chickens of all ages. Some feeders follow the practice of pen feeding for a couple of weeks teries are commonly used in intensive plants, but for ordinary farm use erates are equally satisfactory and are Inexpensive, The quarters where the hirds are to be "finished" should be dry, cool and well ventilated, and the birds should have quiet and freedom from excitement.

The general purpose or henvyweight breeds are best suited for crate feeding and best results can be expected only where strong, vigorous, sturdy type birds are used. Before starting the finishing period, the birds should he dusted with flowers of sulphur or some other suitable preparation to insure their freedom from lice.

China's Coasiline China has a 4,000-mile coastline, borders some 6,000 miles on Soviet Russia and about 4,800 miles on British possessions.

The Delayan Drum and Bugle Corps will lead one section, Elkhorn School Hand another section, tion and the Burlington School Band George Wagner, Sr., has been in the third section A Doll Buggy, the Kenosha haspital the past week Parade will be held Monday afternoon. A carnival of amusements, free attractions, games, rides, etc., will supply Allen and Mrs. Charles Octting and plenty of entertainment. The celebrason, Lewis, of Trevor spent Tuesday tion closes Monday night and an Oldsmobile gift car will be given away, as well as cash prizes each day.

Geese Are Profitable Abundant pasture of a sort that is tender and remains green for a long Dr. William R. Whitney and son, period is the most economical basis pond, or even tanks of water may serve for the aquatic needs of the hirds and shelter may be reduced to a minimum. south is sufficient. Geese can be raised successfully and profitably in more abundant in the Middle West.

Feeding for Production

Many poultrymen are getting higher production by feeding only a small amount of grain in the morning and the remainder at aight. The morning grain is fed in a clean litter from 4 to 6 inches deep and consists of about one nound of grain for each 100 hens. The afternoon feeding is put in troughs. The practice of feeding grain at different intervals of the day, especially during the winter months, increases; the nettvity of the birds and overcomes Idleness.

Beetle Has Headiights America there is a large click bettle which has on the forepart of its body two large luminous spots giving oulso brilliant a light that it is called in some places the "automobile bug."

#### LAKE VILLA

The John Walker home was the scene of a very happy reunion of the Boehm family last Sunday, and more than forty of the family renewed acquaintance. Among them were Mr. and Mrs. Spiegel, Mr. and Mrs. Clement Johnson and children, Mr. and Mrs. Dahlberg, Mr. and Mrs. Sam Pattis, all of Chicago, Mr. and Mrs. Wilson of Northbrook, Mr. and Mrs. Louis Koeppen and sons, Mrs. M. Boehm of Wauconda, the Christofferson family of Wankegan, Mr. and Mrs. Fritz Boehm of Mundelein, Mr. and Mrs. Al Bochm of Lake Villa. The group enjoyed a dinner together and

spent a very pleasant day reminiscing. Mr. and Mrs. William Walker entertained several relatives from Chicage at their home east of town on

Mr. and Mrs. Clarence Miller and small daughter of Chicago spent Sunday at the Carl Miller home.

Mr. and Mrs. Carl Miller drove to southern Michigan early this week and Junior Miller who has been visiting there, returned home.

Mr. and Mrs. James Leonard, Jr., and children of Chicago visited at the James Leonard, Sr., home on Sunday

The Royal Neighbor Officers' Club met last Wednesday afternoon with Mrs. Andrew Wolff at her home at Sand Lake, and several visitors were present to enjoy the social afternoon

Kathleen Gindich was hostess for several of her young friends at a party at her home last Wednesday afternoon

to relchrate her seventh birthday. Mrs. Mary Kapple visited relatives at Grayslake from Wednesday until Sunday night last week.

The Royal Neighbors of Cedar Lake Camp will hold their next regular meeting on Tuesday, June 23rd, in-stead of June 30th, the regular time, and members are asked to note the change of date.

Mr. and Mrs. Raymond Sherwood who spend the greater part of the year in Florida, are at the Clare Sherwood

home to spend the summer months.

Mrs. Stella Pedersen visited her sisters in Chicago on Tuesday and Wednesday and also attended the graduation services of her niece at Longwood Academy and her nephew's graduation from Notre Dame University at South Bend, Indiana.

doing quile well. Mrs. Erwin Barnstable, another sur-gical patient at St. Therese hospital, is recovering slowly. Only mem-bers of her family are allowed to visit

Mrs. McLaren has sold her interest in the "Cozy Inn" in Grayslake road to Mrs. Anna Jackson who lives next

Mr. and Mrs. George Barth and daughter of Chicago spent Saturday and Sunday with Mrs. Barth's mother,

Mrs. McLaren. Mr. and Mrs. Fred Bartlett enter-tained several friends from Wankegan at their home Saturday evening.

A petition for water system is being circulated and even though this has been defeated once, it is hoped that it may go through new, for it is a much needed improvement.

Mr. and Mrs. McCleskey have returned to their home here after having spent several weeks with their daughter in Chicago.

Largest Man-Made Lake The world's largest man-made lake is Lake Mead, the reservoir above Boulder dam. It lies in the deseri land in Arizona and Nevada.

But It's True

Bedbugs are really very nice things to have around, if you do not happen to be rather valo. They eat-food particles, wool-dust and other contributors to the general untidiness of the house. It was in 1909 that the Indian-head penny went out and the Lincoln-head penny came in. The great number of cains was because of difference in incidental markings.

Rumsey, the Great Inventor

James Rumsey, soldier and mechanic, who made steam propel a boat 150 years age, was born on Behemia Manor, near Warwick, Md., in March, 1743. A century and a half ago, on December 3, 1787, he publicly demonstrated a workable steamboat on the Polomec river at Shepherdstown, W. Va. Robert Fulton, who is credited with making the steamboat a commercial success, submitted his first plans a year after Rumsey's death on December.

The Belgian Coage
Although pelitically the Belgian Congo is a dependency of Belgium, it is really just the apposite. Eighty times larger than Belgium, it supplies the mether country with all its coffee, gold, capper, tin, diamonds. It is one of the world's few sources of pitchblende from which comes radium. In the heart of "darkest Africa," Belgian Congo is far from dark. after Rumsey's death on December.

WATCH STANDARDS OF COD LIVER OIL

Potency for Rats Does Not Apply to Chickens.

Any source of vitamin D that is to be included in mixed feeds intended for poultry should be purchased on the line's of its guaranteed potency for chickens instead of rats. The potency of commercial sources of vitamin D is customarily measured by tests made. with rats which do not renet to the different sources of this vitamin as do

chickens. D from coll-liver oil, sardine oil, other fish-liver and fish oils, and irradiated products. In the case of cod-liver oil, new standards have been adopted, and If It is to be sold as such it must now contain at least 85 international viinmin D units and at least 600 lateruntional vitamin A units per grain. Any cod-liver oil that does not meet these requirements must be labeled "end-liver | dence seems to indicate that he can oil, not U. S. P." The designation "Poultry U. S. P.," has been used recently, but it is misleading and its use

is not official. Until some satisfactory chicken unit of vitamin D potency has been established, cod-liver oil may be purchased on the basis of the number of international vitamin D units it contains per gram. All other sources of vitamin D should be purchased on the hasla of the minimum quantity, expressed as per cent of the feed, required to proteet young growing chicks against

rieketa. "Although the official method of stating vitamin D potency is to give the number of international noits per grain, some carriers of cod-liver oil are still marked with the number of units per onnce, and often the unit mennt is not the luternational unit. The purchaser should remember that all units of vitamin D potency are not equal and that ae ounce is more than 28 tlines as heavy as a grain."

#### Sour Skim Milk Good

Beverage for Chicks Sour skin milk is no excellent beverage for haby chicks, according to Dr. hushnodry at the New Jersey College of Agriculture, Rutgers university, 'It increuses their appetites and is a readlly digestible and highly autritious food in itself, he snys.

The rate of growth is stimulated by feeding sour skim milk to chicks during the first six weeks, and the beverage also acts as a regulator of the birds' digestive systems, Doctor Thompson points out. Commercial poultrymen are using this food in increasing quantity lately because it helps to produce good broilers quickly and aids in getting young pullets properly started.

Fresh milk may easily be made sour by using a small amount of sour milk os a starter and adding fresh milk to It each morning. If this is set in a warm room, the souring process will take place rapidly,

Feed the sour wilk in a thickened condition, but first break the clabber by stirring so that the whey as well as the solids will be consumed. Baby chicks may be started on sour mitk during their first day in the brooder and need be fed no water during the entire six weeks, provided there is plenty of the milk on hand. This forces all the chicks to get the sour milk consuming habit.

When feeding sour milk to chicks, it Is advisable to use earthenware or enumelware containers instead of metal receptueles, as the lactic held in the sour milk may have a chemical reaction on the metal.

#### Poultry Cullings If the turkey is to be dry picked,

the work should be begun hamediately while the feathers are loosened.

It costs approximately 80 eggs a year to feed a hen, whether It is a good layer or a poor one.

Farm flock records show that those who brood early chicks make more profit from their tincks thata those who brood late chicks.

Lighting will help to hasten the moult of old birds, and get them back into laying condition quickly,

Shatterings of nifnifa (largely leaves and the finest stems) that accumulate under hay drops and in front of the mangers, are excellent feed.

See that the birds get plenty of sunshine, and do not keep breeders in service too long. The older the birds. after the first year or two, the lower is the quality and fertility of their

Geese represent about one-half of one per cent of all poultry calsed in this country, reports Oktahonia A.

Considerable loss in breakage of eggs in shipment can be avoided if attention is given to the production of eggs with strong shells,

New Hampshire Reds have made a very enviable reputation for themselves. It is hardly believable when you hear of the marvelous results many poultry raisers have had.

### FARM LOPICS

SHOULD TURN EGGS WHILE INCUBATING

Poultry Expert Cites Four Fundamental Factors.

By Dr. W. C. Thompson, Poultry Husband-man, New Jersey Experiment Station. WNU Service.

Temperature, ventilation, moisture and change of position are the four fundamental factors in obtaining good hatches in incubators.

Changing the position of the embryos during the three weeks of development within the shell is very important. Mother hens, incubating their setting of eggs on the old-The poultryman may obtain vitamin | fashioned nest, usually move the eggs beneath them at least twice during the day, thus tending to equalize the exposure of each egg to the conditions of temperature, fresh air and moisture, all of which must be uniformly applied to each egg.

In the operation of the modern incubator, man can well copy this rule of the hen. Experimental evigo the hen one better by doubling the number of turnings during each

24-hour period. If hatching eggs are changed in position once every six hours, optimum results, other things being equal, will generally result. It is partly e matter of preventing the sticking of the developing embryo to some one position within the shell, and partly a matter of equalizing the exposure of the respective eggs to the conditions which will bring about normal, natural embry-

onic growth. Most modern incubators are provided with devices for turning eggs. It is important to be regular and consistent in this practice. It is one of those many small items which, taken collectively, spell successful hatching and the production of

#### Warm Soil Is Necessary

to Grow the Sweet Corn With jnded winter appetites hungering for such spring dishes as roastin' ears, home and commercial vegetable gardeners are advised that no definite date can W. C. Thompson, professor of poultry be given for the safe planting of sweet corn, since the seed will not germinate or grow until the soil is fairly warm, according to B. L. Wenver, of the department of horticulture, University of Illinois, col-

> lege of agriculture. Planting a number of varieties which vary as to time of maturity is a recommended method of obtaining a succession of roasting ears throughout the senson. 'A good succession of white corn may be had 1 / planting Howling Mob, Early Evergreen, Stowell's Evergreen, Narrow Grain Evergreen or Country Gentleman at the same time. A succession of yellow varieties may be obtained by using Purdue Bantam, Golden Bantam, (Bancross), Golden Cross Bantam and Yellow oi Golden Evergreen.

Yield and uniformity are much grenter where hybrid seed is used. Hybrids, because of their vigor and possibly because of some inherent resistance, may be less susceptible to bacterial wilt than openpollinated types.

#### Selecting New Flock

Poultrymen who are selecting their new breeding flock, if they are planning on raising their own baby chicks this spring, says D. D. Moyer, of the Missouri station, should retain only those hens which are healthy. Hens which have laid well certainly should be included. Satisfactory future breeders are also indiented by thoroughly bleached skin In the case of yellow skinned breeds, and an old, dry coat of feathers, a sign of late molting. Pullets to bo used should have large, rugged bodies, well covered with muscle and

They should show early sexual maturity by well developed comb and wattles, and a large, pliable abdomen with flexible pin bones that are spread apart. A healthy flock should be the aim of all poultrymen.

#### Higher Farming Costs

Labor and products bought by the farm in 1937 are predicted by the Department of Agriculture to cause a sharp increase in the cost of farming. Price for feed for live stock and seed will stay high until the crop of the 1937 senson replenishes the present drouth-reduced supply. Farm machinery, fertilizer, and building supplies are expected to advance some in price due mostly to the increased cost of labor and material.

Keep Brood Sows Gaining Brood sows should be kept gaining at the rate of about one pound per day up to farrowing time. Difficulty in farrowing, pig eating and poor milk flow are often traceable In inadequate rations, states a writer in Wallaces' Farmer. A good ration includes about a pound of oats per sow daily, a small amount of protein supplement such as tankage or soy bean meal, free access to legume hay and enough corn to put on the desired gain.

#### Hints for Homemakers By Jane Rogers

D regulated by alternating home current have a definite appeal to the modern woman. These clocks, are not only punctillous time keepers but they come in such a variety of colors and styles as to make it possible to choose a clock that will harmonize with the decorative scheme of any room in the bouse. Beautifully tinted glass clocks and charming timepieces in wood and plastic play an important role in room design. The Telechronmotored clock litustrated, for example, has been especially designed to appeal to the feminine whim, It is styled of glass with mirror fin-Ish. Imitation "Cloisonne" finish on metal makes the dial which is cacircled with black etched-in Roman, numerals. In blue, amber or clear crystal this particular clock makes a charming timepiece for the boudolr or feminine sitting room.

Dld you know that by selecting window shades in a continuance of color tone in which a room is decorated the room achieves a feeling of greater spaciousness? Larkspur blue shades—and incidentally Lark-spur blue is one of the newest and smartest colors to make its appearance in cloth window shades-have been chosen to create just this effect in a room papered in pale blue where the woodwork is palated in

n contrasting darker blue.
This new Larkspur blue window shade has been used with great effectiveness in bathrooms and bedrooms, "The color is a particularly good one for bedrooms as, it keeps out the glare of the summer sun and makes for cool restful sleeping

#### Beauty Hints \_ By Jane Heath \_

TT'S going to be a gay and glddy I summer with overyone of us wearing brilliant colors, vivid stripes and prints. If we aren't careful all this brilliance will overshadow our features, so that we will he known for our costume, and not for our faces.

Don't despair, there is always a way to overcome most things, la this particular case you'll have to highlight your features as you've never done before.

Your eyes will have to shine like stora, your eyelashes will have to he long and gloriously curled upwards. That is where that handy little eyelash curler comes in! It takes only 30 seconds and the effect is emazing!

To make your eyelashes and your brows luxurious and silky, use Kurlene and put it on every single night hofore you go to hed. Use it on those days when you go moscaraless-it gives your eyellds that youthful shiny look.

As for eyeshadow, you'll find yourself using it in the daytime as you never did before. The colors will be fascinating blues, from agun to royal. Greens will be of great importance too, particularly spring-green. You'll want to use silver or gold for evening glamour. Be sure to paint it on with an eyebeauty brush so you achieve a smooth, lovely line. Don't amear on Shadette with your finger,

Don't forget to keep your eyebrows trim and neat, the ensiest way to do it is to use twissors. Loshtint moscara that is flakeproof and water-proof, you'll find a delight for warm weather use and for swimming. It will keep your eyes glamorous at all times,

#### Settlers Protected Forests

The first settlers in America were wiser than many of their descendants, for they recognized the value of forests, passed laws to protect them. Special permission had to be gained to cut trees in Plymouth colony: William Penn demanded that one acre of forest remain unlouched for every five cut.

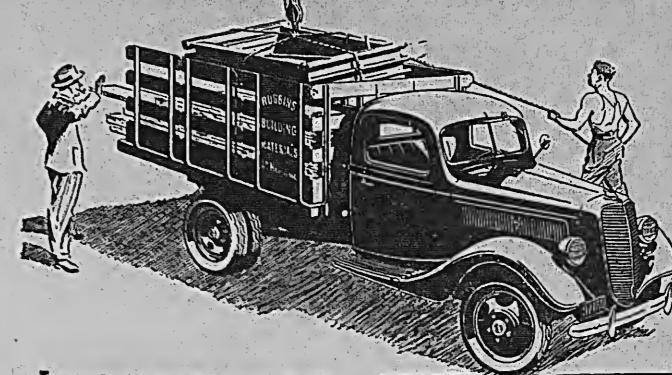

Hallans Play the Numbers People are lottery minded everywhere and play the numbers, by hunch and chance. In Italy, no plous person drenms of the Madonna without rushing out at once to play her numbers, 6, 8 and 15.

Twe Worms for One If a fish worm is cut in two, a new head or tail will grow on to each cut end, making two good worms.

Hums With Its Wlags The humming bird hums with its

## FORD V&B POWER

will do the job at lower costs than ever!

IF yours is heavy hauling, you can handle it faster, easier, and at less cost with the improved 85 H. P. Ford V-8 engine.

For light johs, the 60 H. P. Ford V-8 engine gives splendid performance-with

many extra miles to the gallon of gasoline. With either engine, you get an added economy available only to Ford V-8 owners -the Ford Engine Exchange Plan. You can replace an old engine with a factory-reconditioned one-at much less than the cost of an ordinary engine overhaul.

Let your Ford Dealer help you select the chassis, engine, and body best suited to your loads. Then, let an "on-the-job" test show you how much better-and at how much less cost-you can now do your hauling with modern V-8 power as Ford offers it.

#### Napoleon Chosa Grave on

the Island of St. Helena Jamestown, Island of St. Heiena, is the town and countryside where Napoleon apeut an exile of six years. Longwood, the house where Napo-lean lived, is a long one-story building with a peaked roof, high enough for attic bedrooms for servants. Tha house is partly of martar and is as it was when the deposed emperor of France lived there, notes a writer in the Washington Post.

In this house Napoleon was virtually a prisoner, guarded night and day. He was allowed walks about the countryside, but if he strayed too far an alarm beli rang out, call-

During one of his rambles Napo-leon came upon a spring beneath a great cypress tree which overlooked a peaceful valley. Many times he returned to the place. Ho grew to love the spot and finally asked that when death cama that he might be buried there. Napoleon died on May 5, 1821, and was buried in the space which is surrounded by an iron fence. The bedy was re-moved to Paris October 15, 1840. It is related that on the last page of Napoleon's copybook, used when he was a schoolboy in Corsica, where he was barn, these words are written in his own handwriting:

"St. Heiena, an island in the South Atlantic; British possession." St. Helena lies 1,200 miles west of the coast of Angola, Africa, and about twice this dislanca cast of Brazil. It is in practically the same latituda as Mazambiqua.

#### COSTS TO FARMERS TAKE JUMP IN 1937

Various Things Affect Expense of Crop Raising.

Washington, D. C .- The cost to farmera in raising their 1937 crops probably will be "somewhat higher"than lest year, according to the Department of Agriculture.

Farm labor will cost slightly more. Seed prices already have advanced shorply, and feed prices will be malerially higher than in 1936, the department said. Summarizing the eutlook for farm lobor, equipment and ferlillzer, the

department said: "Wage rates will rise with the conlinued upward trend in the demand for workers in nonagricultural activities, and with the greater demand for hired farm workers that

nermal crop and livestock produc-"Prices paid by farmers for seed have already advanced sharply as a result of drouth-restricted supplies and will continue at relatively. high levels during the 1937 spring planting season.

"During the first half of the year, or until the harvest of the 1937 crop replenishes the present drouth reduced supplies, the feed prices will be materially higher than in 1936.

"Prices of other Items used in production are expected to differ but illtie from the 1936 levels, although the prospective general upturn in the cost of materials and labor entering into the expense of manufacturing farm machinery, fertilizer and building supplies may result in slight advances."

The department said farm wage rates will continue the "slow rise of the last three years" due to an increase in both the nonsgricultural and agricultural damend for laber. Farm wage rales are now the high-

est since 1931. chinery during 1937 probably will exceed those of 1936—which were the highest since 1030 and equal the 1025-29 average, especially if crop conditions are more nearly normal."

Fertilizer sales and prices, it was dukes, and seventeen duchesses. said, probably will average "somewhat higher" than in 1030, but not greatly different from the 1910-1914 average. Use of fertilizer has increased steadly since 1020, it was

#### Shoeing of Oxen Problem for Pageant Officials

Marielta, O.—"Calling all ox-team drivers" is the cry of the United States Northwest Territory Celebration commission as it faces the question of how to shoe the exen which with start December 3 to draw a covered-wegon caravan over the original trail from Ipswich, Mass., to. Marietta, in a re-enoclment of Mrs. Daniel Longman has returned the ploneer journey to the northwest territory.

Cemmission officials explained their dilemma by pointing out that most of the old pioneer trail is paved road today, and oxen must be shed to be driven on these roads. While there are thousands of exteams avallable, most of them are on farms where sheeing is net a problem, and old-timers familiar with sheeing of oxen are becoming

It is known, of course, that the ax shee is in two pieces and differs a good deal from the horseshoe. However, some say that the ox's hoof is tee thin to stand re-shoeing, while others assert that aithough the white part of the hoof is thin and brittle, the black part is tough and will stand frequent re-shoeing.

#### Castle Shrine Is Urged

for Dionne Quintuplets Toranto, Ont. - A granclose plan to enshrine the Dionne quintuplets in the \$2,000,000 Casa Loma "white elephant" castle and—as its apon-sor said — "pay off the entire na-tional debt in twenty years"—was under consideration by the Tarento

civic property committee.

The children would be made "Canada'a greatest tourist attraction" under the scheme of Alder-man Percy Quinn, who was named a committee of one to place the plan before the property commissioner.

The plan would place the guintuplets amid the regal splendor of the castle, built by Sir Henry Pel-latt, which Toronto seized for unpaid taxes. They would reside there eight months of the year.

It was claimed that the stream of visitors to their Callander nursery. now post the 1,000,000 mark, weuld be diverted to Toronto to pay 50 cents a head for admission to the castla grounds.

Punish Bad Grammar Greenville, Pa.-The use of bad grammar by students at Thiel callege has been made a punishable offense—punishable by a reduction in grades.

#### Navy Called Best

Chewing Customer Merida, Yucatan. — According to statistica kept by the chewing gum manufacturers, who buy their raw product here, the best world customer is the United States navy. It is figured that sallars chew more gum on the average than stenagraphers.

#### The Chinese Language

in Picturesque Phrases No language is more thickly interspersed with picturesque phrases and gusty comparisons than the Chinese, writes John W. Mahoney in Nature Magazine. It is often and quite cerreetly said that one can never understand the people of Cathay without an insight into the language of the country, the common dialects of the working classes as well as the formal Mandarin spoken in official and well-to-do cir-

The spoken and written word in the Far Eest sprang from the primeval awe the early sages and philosophers, who first attempted to put their thoughts and desires into pictures or words, felt loward all things natural about them.

At a dinner of congratulation, when a young Chinese friend of mine received an appointment to an important government post, a stately old gentleman expressed his good wishes: "May you soar as the roc to a height of 10,000 ill." Chinese clas-sics are filled with auch quaint expressions, accesseries of speech that are still used in the everyday language of the peasant-coelie as well as the increhant prince and the scholar.

Interwoven into all the traditions of the country, and into many of the customs, are relica of by-gone. dynastics and ages when the worship of nature in the heavens, the seas and on land played a most important part in both the spiritual and the practical life of the Chinese. It is difficult to find treasured tapestries or early paintings that de not have about them some demonstration of this regard for the beauties of nature.

Meaning of Mutation The change in the male voice oc-

curring at the beginning of adolescence is called mutation. Shifting the position of the left hand in violin playing is also known as mu-

# Chevrolet users say: They're the most economical trucks for all-round duty"

Perfected Hydraulic Brakes . . . Greatest **Pulling Power in Their** Price Range . . . New Steelstream Styling

"Give us a truck with ample pulling power . . . one that is economical . . . one that will give reliable service over a long period for the least money."

That is the demand of all truck operators, and thousands of Chevrolet users will tell you that the best answer is-Chevrolet trucks!

Chevrolet trucks have the greatest pulling power in their price range . . . because they have a New High-Compression Valve-in-Head Engine which wrings the last onace of power out of every gallon of fuel.

Chevrolet trucks are the most

economical for all-round duty . . . because they give maximum gas and oil mileage, and will keep on serving over a long period with minimum care and attention.

And Chevrolet trucks are safer, more modern, more durable because they're the only low-priced trucks with Perfected Hydraulic Brakes, New Steelstream Styling, Pressure Stream Lubrication, and extra-strong Chevrolet construction throughout.

Ask your nearest Chevrolet dealer for a thorough demonstration-today!

#### FARM LOPICS

TURKEY PROSPECTS PUZZLE BREEDERS

Too Early to Figure Cost of Feed for Poults.

By E Y. Smith, New York State Agricul-tural Extension Division.—WNU Service. A fair price for poults which will enoble breeders to break even and perhops make a little money in spite of high feed prices is the first point in the turkey outlook.

The outlook applies to those who buy poults from New York state breeders. Cornell veterlary college has found that pullorum disease is not important in the state's turkey flocks, and those tested have been found free of this disease. According to authorities in some other states, pullorum infestation is se-

Second point in the outlook is that commercial growers will probably face higher feed prices for poults the first part of the growing season, which is not so serious because total consumption is not large during

the early port of the season.
Finally, if the expected good wheat crop develops, together with a good corn crop, the probabilities are that turkey rations will be considerably lower from July on through the growing season. Since that is when turkeys eat the most feed, a reduction in price is more important at that time.

These facts indicate a "more favorable" condition for the 1937 turkey grower, though not a "partle-ularly favorable" one.

Portable Brooder House

Favored by Specialist A round - roof portable brooder house, lighter in weight and easier to move than the ordinary shed-roof type may well be one of the factors in the success of the farm poultry enterprise in 1937, according to Corn E. Cooke, extension poultry specialist, University Farm, St. Paul. Besides being more portable, the

house is easier to heat, because of the smaller amount of head space. Another advantage is the window arrangement, for on all four sides there are two windows of bornsosh size. The windows distribute Ads giving telephone number only ing crowding and the development tiser has an established credit at this place. The window arrangement also provides ventilation to fit all weather conditions. In hot weather windows on the four sides may be opened to allow for excellent cross ventilation.

A double floor, which protects the young poultry from cold, is 12 by 14 leet-large enough to accommodate 400 baby chicks or 250 young turkeys. The matrix, or form, for the round roof is easily made by fitting 1-inch material together.

Sloping roosts are constructed nlong the sides. A 500-chick brooder stove may be used in the house. Feeding porches, 12 by 14 feet, may be attached to the house. For

chicks, 1-inch mesh wire should be used; for turkeys, 1 by 2-inch mesh. Discing for Lespedeza Korean lespedeza moy be seeded: safely in oats by discing or drilling

the seed into the soil with the onts or ofter the oats have been seeded. The method of seeding may be similar to that of red clover in wheat, with oats or in thin pastures, says the Indiana Farmer's Guide. Most seedings are broadcast and covering more than an inch in depth may prohibit germination of the lespedeza. If the seed is to be disced into the ground with oats, cover as lightly as possible.

Raising Broiler Birds

The cross of Rhode Island Red hens and Barred Rock males is a popular broiler bird. It is said that they grow faster and ore easier to raise than most pure breeds. Broilers are started on a chick starting ration and can be given hard grain after a short time or raised on an all mash feed. A special broiler ration gives well fleshed birds. The loss in dressing broilers ranges bebetween 13 and 14 per cent.

Down on the Farm

The estimated 1936 production of hay in the United States is 70,165,000

Approximately 4,000,000 acres of Texas land were terraced or contoured in 1936. Wool increases greatly in value, the same as any farm product,

when it is properly grown and prepared for market. Any large-scale war egainst rats should be started with poison, gas, or blocking; never with traps.

There are two kinds of soil erosion-that caused by wind and that

Good pasture reduces the cost of feeding live stock. Agronomists at Ohio State university say that money spent for pasture improvement

should be classed as an investment produced. rather than as an expense.

CAN REDUCE COST OF POULTRY FEED

May Replace Costly Rations With Soybean Meal.

By R. E. Crny, Poultry Oppartment, Onic State University. WNU Service. Poultrymen can reduce the costs of rations for chicks and for the laying tlock by substituting pressure-cured soybean meal for part of the high priced ingredients that are used to furnish the birds protein.

Dried milk and ment scraps, two common materials used to furnish proteln in poultry rutions, cost more than the soybean meal; and the cost of the ration for laying hens is very important at this season of declining egg prices, The soyliean meal can be used to replace at least one-half of the ment scrap and to reduce the amount of dried milk to 2 per cent of the buying ration. From 3 to 5 per cent of dried milk should be kept in chick re-

Ground soybenns containing the natural oll cannot be used successfully as poultry feed, but the meal produced nt mills where the oil is extracted is sullsfactory except that a mineral mixture should be added. The mineral mixture can the made of 40 pounds bone meal, 20 pounds limestone, and 20 pounds salt. This mixture should be used at the rate of one pound to every five pounds of soybean meal;

At present market prices, dried milk is selling for five times as much as soybean meal and meat scraps are nearly twice as expensive, Decreasing the amount of milk in the ration will lower the vitatain G content but this can be supplied by feeding green grass, good legume hay, or alfalfa meal,

Early Care Basis for

Future Flock Profits The future success of the poultry flock depends a great deal upon the care and immagement of growing chicks in the spring. Give them proper care and they will grow into strong, vigorous, profitable birds,

Some of the fundamentals to observe while the chicks are young were pointed out as follows:

Do not overcrowd. See that there re not more than two chicks for each square foot of fleor space in the brood-

founts for each 100 chlcks. One fivefoot mush hopper will be enough for each 100 chicks during the first three

From the age of three weeks until they reach broller size, each 100 chicks should have two much hoppers four inches high, six inches wide, and five feet long.

Inndequate feeding and drinking facilities is one of the worst faults in poultry raising.

Have adequately controlled ventilation. More chicks are killed or weak ened by overheating than by chilling. Keep the feed hoppers filled with a well balanced mash.

Alm to have the chleks consuming about equal parts of mash and seruteh feed at the sixth week.

Maintain rigid sanitation. Cull all slow developing chicks. These seldom "come through" and prove probable.

When the weather permits, get the chicks ont on the ground. A great deal of benefit is gained from sunshine, green feed, and fresh ulr.

Use Clean Dry Litter

Straw is not the best litter there is for buby chicks. Ont hulls, peat moss, finely ground corn cobs, shavings, etc., are said to be better. If merely the "best" illter were the only consideration not much would be left to say on the subject. The facts are farmers have to get by as cheaply as posslide and at the same time strive for good results. It is true that wheat and out straw becomes damp quickly and if not chopped up fine is tee coarse for small chicks, yet on most farms it is by far the cheapest litter available, is grown on the farm and requires no outlny of cash. That good results can be had by using it is indisputable. The important thing about it is to use plenty-change it often.

Poultry Notes A good lighting system in the poultry house increases the annual production of the birds.

Eggs from yearling hens are best for hatching, as breeding stock must be fully matured to obtain strong, healthy

The poultry industry is a sizable business, worthy of best efforts whether in research, teaching, production or marketing.

Hens should be kept housed in winter, but should have straw to scratch in, so they may exercise.

The upkeep of a nock of bantams, large or small, is about half the cost of a like amount of regular size penitry. They eat little more than a

Ten per cent or more of the pullets can be culled from the flock at the end of the first laying season without materially affecting the number of eggs
